*I use email to update you on the progress (order received, scanning in progress, order shipped, etc.).

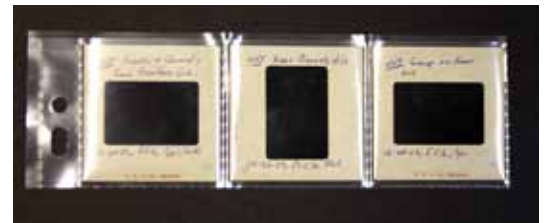

Total number of slides/negatives to scan: **3**

IF YOU'RE SENDING SLIDES:

Protect your slides when you mail them to me.

OPTION 1: Place your 3 slides in a plastic film sleeve specifically designed to protect slides. Trim the plastic as shown and place the protected slides into a "Photo Mailer" style envelope (shown at top).

OPTION 2: Stack the 3 slides together and gently wrap them in a paper towel and place them into a "Photo Mailer" style envelope (shown at top). No need to rubber-band or scotch tape the wrapped slides - they'll fit snug enough inside the protective envelope that it will hold them together during shipping.

IF YOU'RE SENDING NEGATIVES:

Protect your negatives when you mail them to me.

Place your negative strip(s) in a plastic film sleeve specifically designed to protect negatives.

DO NOT CUT NEGATIVES out of the strips.

Clearly identify which negative(s) you want to be scanned by marking on the outside of the plastic protective sheet (as shown in example, using Marks-a-Lot or Sharpie permanent marker). DO NOT WRITE ON THE NEGATIVE.

Place the protected negatives into a "Photo Mailer" style envelope (shown at top).
